### **Caribe Royale Spends \$3.5 Million on Main Lobby Building Renovation**

September 28, 2014 ORLANDO, Fla. Caribe Royale All-Suite Hotel & Convention Center announces a 2014 renovation to the Main Reception Building. The project creates two new lounges and refurbishes the main lobby and public areas with new flooring, wall coverings, fixtures and furniture on both upper and lower levels of the building. Tower III which contains guest suites is also receiving new carpet, fixtures and wall coverings in the public areas and corridors. A completion date is set for mid-December 2014.

The goal of the renovation is to update the areas with a contemporary, modern look and feel. Concentrating on a sophisticated, welcoming aesthetic, the new colors are rooted in Mediterranean palettes with earth tone accents, washed greys, terra cotta, clean lines, live plants and an overall tailored yet luxurious feel. Architecturally inspired furniture selections, beautiful lighting and updated art complete the refined yet approachable vibe.

"We are incredibly excited to debut our new look," states Eric Rosenbaum, vice president of operations for Sierra Lodgings, Inc., "We believe that the state-of-the-art amenities and fresh design are exactly what today's guests are seeking."

Updates to the renovation can be found on the hotel's special webpage at <http://www.cariberoyale.com/2014renovation>.

The Caribe Royale is an all-suite hotel in Orlando, Florida that features 1,218 one-bedroom suites and 120 two-bedroom villas and is located 1.5 miles from the Walt Disney World® Theme Parks. Each suite and villa is elegantly appointed and ideal for families or business travelers. Owned and operated by the Sierra Land Group in Glendale, CA, the Caribe Royale is located in the Lake Buena Vista area. More information about Caribe Royale is available by visiting <http://www.cariberoyale.com>.
